-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 30days MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a method for rolling oil-containing agricultural products or other types of grain using a rotatable roll, classified in class 426, subclass 486.
- II. Claims 2-4, drawn to a method for processing or flocking foodstuffs using a rotatable roll, classified in class 426, subclass 512.
- III. Claims 5-9, drawn to a roll for processing foodstuffs, classified in class 7, subclass 111.

The inventions are distinct, each from the other because:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus of Group III as claimed can be used to practice another and materially different process, e.g. for use in rolling non-edible materials such as thermoplastic and clay materials. Moreover, the methods of Groups I and II as claimed can be practiced without the specifics of the Group III apparatus such as a metal roll body, a covering of a mixture of synthetic material and rubber, the covering has a hardness equal to a hardness of quenched and tempered steel, and the covering is mounted releasably on the roll body.

The methods of Groups I and II are mutually exclusive each from the other for the following reasons:

1. The method of Group I does not require the step of processing foodstuffs comprising intermediate processing of foodstuffs and flocking of foodstuffs.
2. The method of Group II does not require the step of rolling oil-containing agricultural products or other types of grains.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring separate searches as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication from the examiner should be directed to Examiner George C. Yeung whose telephone number is (703) 308-3848. The examiner can generally be reached on Monday-Friday from 10:30 a.m. to 7:00 p.m..
